NEUBERGER BERMAN INTERNATIONAL SELECT FUND

SUMMARY PROSPECTUS

Class A Shares (NBNAX), Class C Shares (NBNCX), Institutional Class Shares (NILIX)

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund (including the Fund's SAI) online at: for Class A shares, <http://www.nb.com/equityfunds/a>; for Class C shares, <http://www.nb.com/equityfunds/c>; or for Institutional Class shares, <http://www.nb.com/equityfunds/institutional>. You can also get this information at no cost by calling 877-628-2583 (Class A and Class C) or 800-366-6264 (Institutional Class), or by sending an e-mail request to fundinfo@nb.com. You can also get this information from your investment provider or any investment provider authorized to sell the Fund's shares. The Fund's prospectus and SAI, each dated December 6, 2018 (as each may be amended or supplemented), are incorporated herein by reference.

GOAL

The Fund seeks long-term growth of capital by investing primarily in common stocks of foreign companies.

FEES AND EXPENSES

These tables describe the fees and expenses that you may pay if you buy, hold or sell shares of the Fund. Under the Fund's policies, you may qualify for initial sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Neuberger Berman funds. Certain financial intermediaries have sales charges and/or policies and procedures regarding sales charge waivers applicable to their customers that differ from those described below. More information about these and other discounts is available from your financial intermediary, in "Sales Charge Reductions and Waivers" on page 232 in the Fund's prospectus, and in Appendix A to the Fund's prospectus. Although the Fund does not impose any sales charge on Institutional Class shares, you may pay a commission to your broker on your purchases and sales of those shares, which is not reflected in this table.

	Class A	Class C	Institutional Class
Shareholder Fees (fees paid directly from your investment)			
Maximum initial sales charge on purchases (as a % of offering price)	5.75	None	None
Maximum contingent deferred sales charge (as a % of the lower of original purchase price or current market value) ¹	None	1.00	None
Annual Fund Operating Expenses (expenses that you pay each year as a % of the value of your investment)			
Management fees	0.81	0.81	0.70
Distribution and/or shareholder service (12b-1) fees	0.25	1.00	None
Other expenses	0.26	0.26	0.24
Total annual operating expenses	1.32	2.07	0.94
Fee waiver and/or expense reimbursement	0.15	0.15	0.13
Total annual operating expenses after fee waiver and/or expense reimbursement ²	1.17	1.92	0.81

¹ For Class A shares, a contingent deferred sales charge ("CDSC") of 1.00% applies on certain redemptions made within 18 months following purchases of \$1 million or more made without an initial sales charge. For Class C shares, the CDSC is eliminated after one year of purchase.

² Neuberger Berman Investment Advisers LLC ("Manager") has contractually undertaken to waive and/or reimburse certain fees and expenses of Class A, Class C and Institutional Class so that the total annual operating expenses (excluding interest, taxes, brokerage commissions, acquired fund fees and expenses, dividend and interest expenses relating to short sales, and extraordinary expenses, if any) ("annual operating expenses") of each class are limited to 1.16%, 1.91% and 0.80% of average net assets, respectively. Each of these undertakings lasts until 8/31/2022 and may not be terminated during its term without the consent of the Board of Trustees. The Fund has agreed that each of Class A, Class C and Institutional Class will repay the Manager for fees and expenses waived or reimbursed for the class provided that repayment does not cause annual operating expenses to exceed 1.16%, 1.91% and 0.80% of the class' average net assets, respectively. Any such repayment must be made within three years after the year in which the Manager incurred the expense.

Supplement to the Summary Prospectuses, Prospectuses, and the Statement of Additional Information of International Equity Portfolio

U0005 01/19

Neuberger Berman Equity Funds®

Supplement to the Summary Prospectuses, Prospectuses, and the Statement of Additional Information of Neuberger Berman Global Equity Fund, Neuberger Berman International Equity Fund and Neuberger Berman International Select Fund

Effective immediately, Mr. Elias Cohen has been made a portfolio manager of the International Equity Portfolio, Neuberger Berman Global Equity Fund, Neuberger Berman International Equity Fund and Neuberger Berman International Select Fund.

Effective immediately, all references to Mr. David Bunan in the summary prospectuses, prospectuses, and Statement of Additional Information of International Equity Portfolio and the Neuberger Berman International Equity Fund are deleted in their entirety.

Effective immediately, the Funds' summary prospectuses and prospectuses are revised as follows:

(a) The section titled "Portfolio Managers" in the summary prospectuses and prospectuses for International Equity Portfolio and Neuberger Berman International Equity Fund is deleted in its entirety and replaced with the following:

Portfolio Managers

The Fund is managed by Benjamin Segal (Managing Director of the Manager) and Elias Cohen (Managing Director of the Manager). Mr. Segal has managed the Fund since its inception in 2005, and Mr. Cohen has co-managed the Fund since January 2019.

(b) The section titled "Portfolio Manager" in the summary prospectus and prospectus for Neuberger Berman Global Equity Fund is deleted in its entirety and replaced with the following:

Portfolio Managers

The Fund is managed by Benjamin Segal (Managing Director of the Manager) and Elias Cohen (Managing Director of the Manager). Mr. Segal has managed the Fund since its inception in 2011, and Mr. Cohen has co-managed the Fund since January 2019.

(c) The section titled "Portfolio Managers" in the summary prospectuses and prospectuses for Neuberger Berman International Select Fund is deleted in its entirety and replaced with the following:

Portfolio Managers

The Fund is managed by Benjamin Segal (Managing Director of the Manager) and Elias Cohen, CFA (Managing Director of the Manager). Mr. Segal has managed the Fund since its inception in 2006, and Mr. Cohen has co-managed the Fund since December 2016.

(d) The section titled "Management of the Fund - Portfolio Managers" in the prospectuses for International Equity Portfolio and Neuberger Berman International Equity Fund is deleted in its entirety and replaced with the following:

Benjamin Segal is a Managing Director of the Manager. Mr. Segal joined the firm in 1999 and has been the Portfolio Manager of the Fund since 2005.

Elias Cohen, CFA, is a Managing Director of the Manager. Mr. Cohen joined the firm in 2000 and has been a Portfolio Manager of the Fund since January 2019.

(e) The following is added to the “Management of the Funds — Portfolio Managers” section of the prospectus for Neuberger Berman Global Equity Fund:

Elias Cohen, CFA, is a Managing Director of the Manager. Mr. Cohen joined the firm in 2000 and has been a Portfolio Manager of the Fund since January 2019.

(f) The “Management of the Funds — Portfolio Managers” section of the prospectuses for Neuberger Berman International Select Fund is deleted in its entirety and replaced with the following:

Benjamin Segal is a Managing Director of the Manager. Mr. Segal joined the firm in 1999 and has been a Portfolio Manager of the Fund since its inception in 2006.

Elias Cohen, CFA, is a Managing Director of the Manager. Mr. Cohen joined the firm in 2000 and has co-managed the Fund since December 2016.

The date of this supplement is January 16, 2019.

Please retain this supplement for future reference.

Expense Example

The expense example can help you compare costs among mutual funds. The example assumes that you invested \$10,000 for the periods shown, that you redeemed all of your shares at the end of those periods, that the Fund earned a hypothetical 5% total return each year, and that the Fund's expenses were those in the table. For Class A and Institutional Class shares, your costs would be the same whether you sold your shares or continued to hold them at the end of each period. Actual performance and expenses may be higher or lower.

	1 Year	3 Years	5 Years	10 Years
Class A	\$687	\$925	\$1,214	\$2,035
Class C (assuming redemption)	\$295	\$603	\$1,070	\$2,362
Class C (assuming no redemption)	\$195	\$603	\$1,070	\$2,362
Institutional Class	\$ 83	\$259	\$ 480	\$1,117

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 44% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

To pursue its goal, the Fund invests mainly in common stocks of foreign companies, including companies in developed and emerging markets. The Fund defines a foreign company as one that is organized outside of the United States and conducts the majority of its business abroad. Under normal circumstances, at least 80% of the Fund's net assets, plus the amount of any borrowings for investment purposes, will be invested in companies with a market capitalization greater than \$2.5 billion at the time of purchase.

The Fund seeks to reduce risk by diversifying among many industries. Although the Fund has the flexibility to invest a significant portion of its assets in one country or region, it generally intends to remain well-diversified across countries and geographical regions.

In picking stocks, the Portfolio Managers look for what they believe to be well-managed and profitable companies that show growth potential and whose stock prices are undervalued. Factors in identifying these firms may include strong fundamentals, such as attractive cash flows and balance sheets, as well as prices that are reasonable in light of projected returns. The Portfolio Managers also consider the outlooks for various countries and sectors around the world, examining economic, market, social, and political conditions.

The Portfolio Managers follow a disciplined selling strategy and may sell a stock when it reaches a target price, if a company's business fails to perform as expected, or when other opportunities appear more attractive.

PRINCIPAL INVESTMENT RISKS

Most of the Fund's performance depends on what happens in international stock markets, the Portfolio Managers' evaluation of those developments, and the success of the Portfolio Managers in implementing the Fund's investment strategies. The markets' behavior can be difficult to predict, particularly in the short term. There can be no guarantee that the Fund will achieve its goal. The Fund may take temporary defensive and cash management positions; to the extent it does, it will not be pursuing its principal investment strategies.

The Fund is a mutual fund, not a bank deposit, and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. The value of your investment may fall, sometimes sharply, and you could lose money by investing in the Fund.

The following risks, which are described in alphabetical order and not in order of importance or potential exposure, can significantly affect the Fund's performance:

Currency Risk. To the extent that the Fund invests in securities or other instruments denominated in or indexed to foreign currencies, changes in currency exchange rates could adversely impact investment gains or add to investment losses. Currency

exchange rates may fluctuate significantly over short periods of time and can be affected unpredictably by intervention, or failure to intervene, by U.S. or foreign governments or central banks or by currency controls or political developments in the U.S. or abroad.

Foreign and Emerging Market Risk. Foreign securities involve risks in addition to those associated with comparable U.S. securities. Additional risks include exposure to less developed or less efficient trading markets; social, political, diplomatic, or economic instability; trade barriers and other protectionist trade policies (including those of the U.S.); significant government involvement in an economy and/or market structure; fluctuations in foreign currencies or currency redenomination; potential for default on sovereign debt; nationalization or expropriation of assets; settlement, custodial or other operational risks; higher transaction costs; confiscatory withholding or other taxes; and less stringent auditing, corporate disclosure, governance, and legal standards. As a result, foreign securities may fluctuate more widely in price, and may also be less liquid, than comparable U.S. securities. Regardless of where a company is organized or its stock is traded, its performance may be affected significantly by events in regions from which it derives its profits or in which it conducts significant operations.

Investing in emerging market countries involves risks in addition to and greater than those generally associated with investing in more developed foreign countries. The governments of emerging market countries may be more unstable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, intervene in the financial markets, and/or impose burdensome taxes that could adversely affect security prices. In addition, the economies of emerging market countries may be dependent on relatively few industries that are more susceptible to local and global changes. Emerging market countries may also have less developed legal and accounting systems. Securities markets in emerging market countries are also relatively small and have substantially lower trading volumes. Securities of issuers in emerging market countries may be more volatile and less liquid than securities of issuers in foreign countries with more developed economies or markets and the situation may require that the Fund fair value its holdings in those countries.

Securities of issuers traded on foreign exchanges may be suspended, either by the issuers themselves, by an exchange, or by governmental authorities. The likelihood of such suspensions may be higher for securities of issuers in emerging or less-developed market countries than in countries with more developed markets. Trading suspensions may be applied from time to time to the securities of individual issuers for reasons specific to that issuer, or may be applied broadly by exchanges or governmental authorities in response to market events. Suspensions may last for significant periods of time, during which trading in the securities and in instruments that reference the securities, such as derivative instruments, may be halted. In the event that the Fund holds material positions in such suspended securities or instruments, the Fund's ability to liquidate its positions or provide liquidity to investors may be compromised and the Fund could incur significant losses.

From time to time, based on market or economic conditions, the Fund may invest a significant portion of its assets in one country or geographic region. If the Fund does so, there is a greater risk that economic, political, regulatory, diplomatic, social and environmental conditions in that particular country or geographic region may have a significant impact on the Fund's performance and that the Fund's performance will be more volatile than the performance of more geographically diversified funds.

Growth Stock Risk. Because the prices of most growth stocks are based on future expectations, these stocks tend to be more sensitive than value stocks to bad economic news and negative earnings surprises. The Fund attempts to lessen the risk of such losses by seeking growth stocks that sell at what the adviser believes are reasonable prices. If the adviser is incorrect in its assessment of a stock's value, this strategy may not provide the expected downside protection. Bad economic news or changing investor perceptions may adversely affect growth stocks across several sectors and industries simultaneously.

Risk of Increase in Expenses. A decline in the Fund's average net assets during the current fiscal year due to market volatility or other factors could cause the Fund's expenses for the current fiscal year to be higher than the expense information presented in "Fees and Expenses."

Issuer-Specific Risk. An individual security may be more volatile, and may perform differently, than the market as a whole.

Liquidity Risk. From time to time, the trading market for a particular investment in which the Fund invests, or a particular instrument in which the Fund is invested, may become less liquid or even illiquid. Illiquid investments frequently can be more difficult to purchase or sell at an advantageous price or time, and there is a greater risk that the investments may not be sold for the price at which the Fund is carrying them. Certain investments that were liquid when the Fund purchased them may become illiquid, sometimes abruptly. An inability to sell a portfolio position can adversely affect the Fund's value or prevent the Fund from being able to take advantage of other investment opportunities. Market prices for such securities or other investments may be volatile. During periods of substantial market volatility, an investment or even an entire market segment may become illiquid, sometimes abruptly, which can adversely affect the Fund's ability to limit losses.

Liquidity risk may be magnified in rising interest rate environments due to higher than normal redemption rates. Unexpected episodes of illiquidity may limit the Fund's ability to pay redemption proceeds within the allowable time period. To meet redemption requests during periods of illiquidity, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions.

Market Capitalization Risk. To the extent the Fund invests in securities of small-, mid-, or large-cap companies, it takes on the associated risks. At times, any one of these market capitalizations may be out of favor with investors. Compared to small- and mid-cap companies, large-cap companies may be unable to respond as quickly to changes and opportunities. Compared to large-cap companies, small- and mid-cap companies may depend on a more limited management group, may have a shorter history of operations, and may have limited product lines, markets or financial resources. The securities of small- and mid-cap companies are often more volatile and less liquid than the securities of larger companies and may be more affected than other types of securities by the underperformance of a sector or during market downturns.

Market Volatility Risk. Markets may be volatile and values of individual securities and other investments, including those of a particular type, may decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. Geopolitical risks may add to instability in world economies and markets generally. Changes in value may be temporary or may last for extended periods. If the Fund sells a portfolio position before it reaches its market peak, it may miss out on opportunities for better performance.

Operational and Cybersecurity Risk. The Fund and its service providers, and your ability to transact with the Fund, may be negatively impacted due to operational matters arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow an unauthorized party to gain access to fund assets, customer data, or proprietary information, or cause the Fund or its service providers, as well as the securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for the Manager or the other Fund service providers to identify all of the cybersecurity or other operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Most issuers in which the Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which the Fund invests, leading to significant loss of value.

Recent Market Conditions. Some countries, including the U.S., are adopting more protectionist trade policies and moving away from the tighter financial industry regulations that followed the 2008 financial crisis. The U.S. is also said to be considering significant new investments in infrastructure and national defense which, coupled with lower federal taxes, could lead to sharply increased government borrowing and higher interest rates. The exact shape of these policies is still being worked out through the political process, but the equity and debt markets may react strongly to expectations, which could increase volatility, especially if the market's expectations for changes in government policies are not borne out. Also, prices of many U.S. equity securities have increased substantially over several years, U.S. unemployment has declined and many market prognosticators reportedly expect the Fed to continue raising interest rates in an effort to limit inflation and/or believe the market may experience a "correction" to lower values. Higher interest rates may further strengthen the already strong U.S. dollar, which may harm U.S. companies that rely significantly on exports.

High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. Interest rates have been unusually low in recent years in the U.S. and abroad. Because there is little precedent for this situation, it is difficult to predict the impact on various markets of a significant rate increase or other significant policy changes. There is a greater risk of rising interest rates than has historically been the case due to the current period of relatively low rates and the effect of government fiscal policy initiatives and potential market reaction to those initiatives.

In addition, national economies and financial markets are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. The rise in protectionist trade policies, changes to some major international trade agreements and the potential for changes to others, could affect the economies of many nations in ways that cannot necessarily be foreseen at the present time.

Redemption Risk. The Fund may experience periods of heavy redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets. Heavy redemptions could hurt the Fund's performance.

Risk Management. Risk is an essential part of investing. No risk management program can eliminate the Fund’s exposure to adverse events; at best, it may only reduce the possibility that the Fund will be affected by such events, and especially those risks that are not intrinsic to the Fund’s investment program. The Fund could experience losses if judgments about risk prove to be incorrect.

Sector Risk. From time to time, based on market or economic conditions, the Fund may have significant positions in one or more sectors of the market. To the extent the Fund invests more heavily in particular sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. The industries that constitute a sector may all react in the same way to economic, political or regulatory events.

Valuation Risk. The Fund may not be able to sell an investment at the price at which the Fund has valued the investment. The Fund’s ability to value its investments in an accurate and timely manner may be impacted by technological issues and/or errors by third party service providers, such as pricing services or accounting agents.

Value Stock Risk. Value stocks may remain undervalued or may decrease in value during a given period or may not ever realize what the portfolio management team believes to be their full value. This may happen, among other reasons, because of a failure to anticipate which stocks or industries would benefit from changing market or economic conditions or investor preferences, or a misappraisal of a stock’s growth potential.

PERFORMANCE

The following bar chart and table provide an indication of the risks of investing in the Fund. The bar chart shows how the Fund’s performance has varied from year to year, as represented by the performance of the Fund’s Institutional Class. The returns in the bar chart do not reflect any applicable sales charges. If sales charges were reflected, returns would be lower than those shown. The table below the bar chart shows what the returns would equal if you averaged out actual performance over various lengths of time and compares the returns with the returns of a broad-based market index. The index, which is described in “Descriptions of Indices” in the prospectus, has characteristics relevant to the Fund’s investment strategy. Unlike the returns in the bar chart, the returns in the table reflect the maximum applicable sales charges.

Returns would have been lower if the Manager had not reimbursed certain expenses and/or waived a portion of the investment management fees during certain of the periods shown.

Past performance (before and after taxes) is not a prediction of future results. Visit www.nb.com or call 800-366-6264 for updated performance information.

YEAR-BY-YEAR % RETURNS AS OF 12/31 EACH YEAR

Best quarter: Q2 '09, 22.51%
Worst quarter: Q3 '08, -22.17%
Year-to-date performance as of 9/30/2018: -1.22%

AVERAGE ANNUAL TOTAL % RETURNS AS OF 12/31/17

International Select Fund	1 Year	5 Years	10 Years
Institutional Class Return Before Taxes	27.55	7.60	2.72
Institutional Class Return After Taxes on Distributions	27.21	7.25	2.39
Institutional Class Return After Taxes on Distributions and Sale of Fund Shares	15.86	5.93	2.08
Class A Return Before Taxes	19.94	5.97	1.75
Class C Return Before Taxes	25.22	6.42	1.60
MSCI EAFE [®] Index (Net) (reflects reinvested dividends net of withholding taxes, but reflects no deduction for fees, expenses or taxes)	25.03	7.90	1.94

After-tax returns are shown for Institutional Class shares only and after-tax returns for other classes may vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

INVESTMENT MANAGER

Neuberger Berman Investment Advisers LLC ("Manager") is the Fund's investment manager.

PORTFOLIO MANAGERS

The Fund is managed by Portfolio Manager Benjamin Segal (Managing Director of the Manager) and Associate Portfolio Manager Elias Cohen, CFA (Senior Vice President of the Manager). Mr. Segal has managed the Fund since its inception in 2006, and Mr. Cohen joined as an Associate Portfolio Manager in December 2016.

BUYING AND SELLING SHARES

You may purchase, redeem (sell) or exchange shares of the Fund on any day the New York Stock Exchange is open, at the Fund's net asset value per share next determined after your order is received in proper form, subject to any applicable sales charge. Shares of the Fund generally are available only through certain investment providers, such as banks, brokerage firms, workplace retirement programs, and financial advisers. Contact any investment provider authorized to sell the Fund's shares. See "Maintaining Your Account" in the prospectus for eligibility requirements for purchases of Institutional Class shares.

For certain investors, certain shares of the Fund may be available directly from Neuberger Berman BD LLC by regular, first class mail (Neuberger Berman Funds, Boston Service Center, P.O. Box 8403, Boston, MA 02266-8403), by express delivery, registered mail, or certified mail (Neuberger Berman Funds, c/o State Street Bank and Trust Company, 30 Dan Road, Canton, MA 02021), or by wire, fax, telephone, exchange, or systematic investment or withdrawal (call 800-877-9700 for instructions). See "Maintaining Your Account" and "Direct Investors" in the prospectus for eligibility requirements for direct purchases of shares and for instructions on buying and redeeming (selling) shares directly.

The minimum initial investment in Class A or Class C shares is \$1,000. Additional investments can be as little as \$100. These minimums may be waived in certain cases.

The minimum initial investment in Institutional Class shares is \$1 million. This minimum may be waived in certain cases.

TAX INFORMATION

Unless you invest in the Fund through a tax-advantaged retirement plan or account or are a tax-exempt investor, you will be subject to tax on Fund distributions to you of ordinary income and/or net capital gains. Those distributions generally are not taxable to such a plan or account or a tax-exempt investor, although withdrawals from certain retirement plans and accounts generally are subject to federal income tax.

PAYMENTS TO INVESTMENT PROVIDERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the Fund through an investment provider or other financial intermediary, such as a bank, brokerage firm, workplace retirement program, or financial adviser (who may be affiliated with Neuberger Berman), the Fund and/or Neuberger Berman BD LLC and/or its affiliates may pay the intermediary for the sale of Fund shares and related services. These

payments may create a conflict of interest by influencing the investment provider or other financial intermediary and its employees to recommend the Fund over another investment. Ask your investment provider or visit its website for more information.
