Current performance may be lower or higher than the quoted past performance, which is not a reliable indicator of future performance. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital by investing primarily in common stocks of small growth companies.

The fund will normally invest primarily in small-cap growth companies. The portfolio will be broadly diversified, and the top 25 holdings will not constitute a large portion of assets.

We employ a number of quantitative models developed by T. Rowe Price to identify stocks that could be included in the portfolio.

BENEFITS AND RISKS

The fund offers greater capital appreciation potential than large-company stocks.

The fund's broad diversification may make it less volatile than small-cap growth funds that have more concentrated portfolios.

The fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings. Small companies tend to be riskier than large companies.
