INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital appreciation through investments in common stocks of growth companies.

The fund focuses on companies having the following characteristics:

- Above-average growth in earnings and cash flow
- Ability to sustain earning momentum even during economic slowdowns
- Occupation of a lucrative niche in the economy and ability to expand even during times of slow economic growth

The fund will normally invest at least 80% of net assets in the common stocks of large companies.

BENEFITS AND RISKS

Our investment approach reflects our belief that when a company increases its earnings faster than both inflation and the overall economy, the market will eventually reward it with a higher stock price.

As with all equity funds, this fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings.
